INTRODUCTION

This report is intended to advise both government and industry of the current situation with respect to trends in the shipments of New Brunswick table potatoes. This, in turn, hopefully, will assist in the planning and implementation of marketing activities designed to arrest the decline in market share in some markets or to take advantage of potential in others.

As a follow up to this report, an attempt will be made to determine why there has been a decline in shipments and market share in some markets and increases in others. It has been said that changes have occurred due to: the difference in values of the Canadian and United States dollar, a movement toward higher levels of self-sufficiency in Quebec and Ontario, changes in supply and demand, a shift toward higher capacity and more versatile packing plants, etc.

If any of the readers of this report would like to offer any comments on the current trends in table potato shipments, please forward them to the Market Development Branch. Your cooperation would be greatly appreciated.

SOURCE OF INFORMATION

The data used in this report were collected from the following Agriculture Canada publications:

Potato Market Review
Fruit, Vegetable and Honey Crop and Market Reports
Annual Unload Reports - Fresh Fruits and Vegetables
Crop and Seasonal Price Summaries

(Data for the years preceding 1978-79 on destination of table potato shipments from New Brunswick and Prince Edward Island were unavailable.)

NEW BRUNSWICK TABLE POTATO SHIPMENTS

New Brunswick's largest markets over the last 5 years have been to Quebec and the United States. However, the Quebec market has been reducing sharply during this period and now stands at 39.84% of total volume shipped compared with 66.89% in 1978-79. The volume shipped to the United States has been increasing during this period and now stands at 48.83% of total volume shipped. Volumes shipped to other markets have remained relatively consistent throughout this period.

PRINCE EDWARD ISLAND TABLE POTATO SHIPMENTS

Over the last 5 years, Prince Edward Island's largest markets have been Quebec and Ontario where they have shipped approximately 23% and 32% respectively of their total volume of table potatoes. Over this same period, Prince Edward Island has been increasing their volume shipped to the United States and off-shore markets, where in 1982-83 they shipped 18% and 13.92% respectively of their total volume to these markets. The Newfoundland, Nova Scotia and New Brunswick markets have remained stable during this period, with an average percentage of volume shipped holding at 8.34%, 8.45% and 3.20% respectively.

HALIFAX TABLE POTATO MARKET

The Halifax potato market is supplied mainly from Prince Edward Island, which has over the last 15 year period, accounted for an average of 65.07% of the market. Nova Scotia and the United States with 23.47% and 10.25% respectivelv, are the next largest suppliers of this market. New Brunswick has not made any significant gains in the Halifax market within the last 15 year period accounting for an average of less than one-fifth of one percent of the total market without any market share in 1982-83. Over the last five years, Prince Edward Island has taken away approximatelv 10% of the total market from Nova Scotia and the United States combined and held 67.96% of the Halifax market in 1982-83.

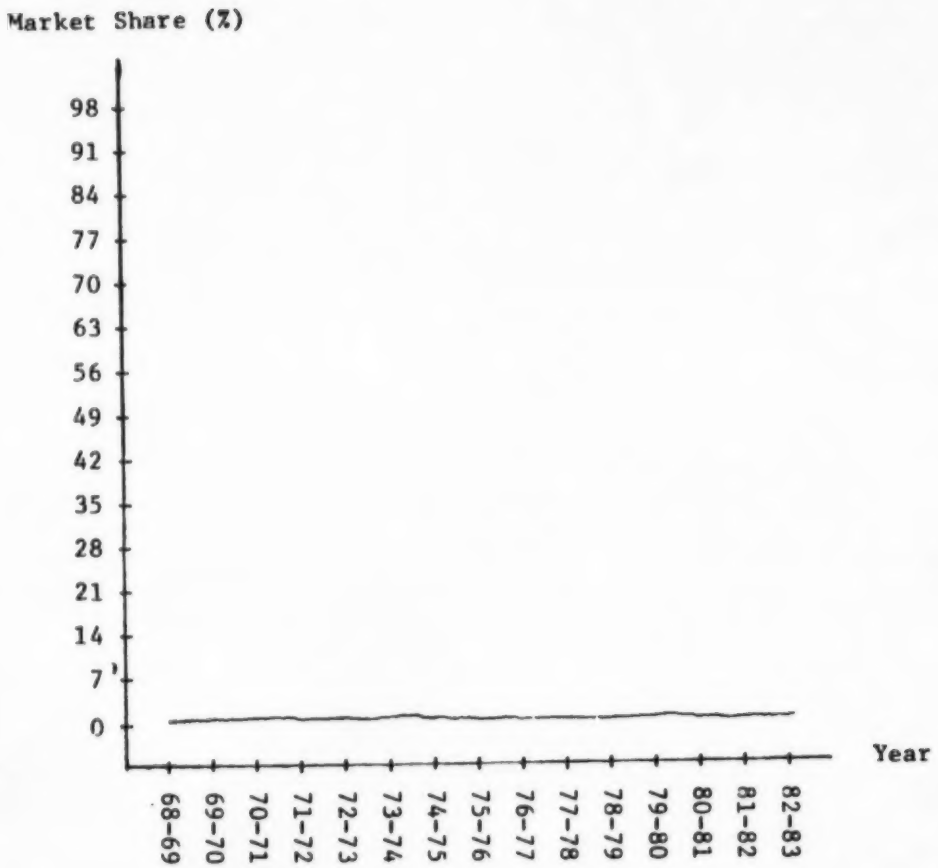
NEW BRUNSWICK SHIPMENTS TO THE
HALIFAX TABLE POTATO MARKET



SAINT JOHN TABLE POTATO MARKET

The Saint John potato market is largely supplied by New Brunswick, Prince Edward Island and the United States. New Brunswick, over the past 15 years, has accounted for an average of 69.56% of this market. Over the same period, Prince Edward Island and the United States have accounted for 20.91% and 9.28% respectively. New Brunswick has, however, over the last 5 years dropped slightly more than 13% of the total market from a high of 86.59% in 1978-79 to 73.42% in 1982-83. This drop in market share by New Brunswick has been picked up by Prince Edward Island which has over the same 5 year period increased its market share over 14% to its current 20.01% in 1982-83.

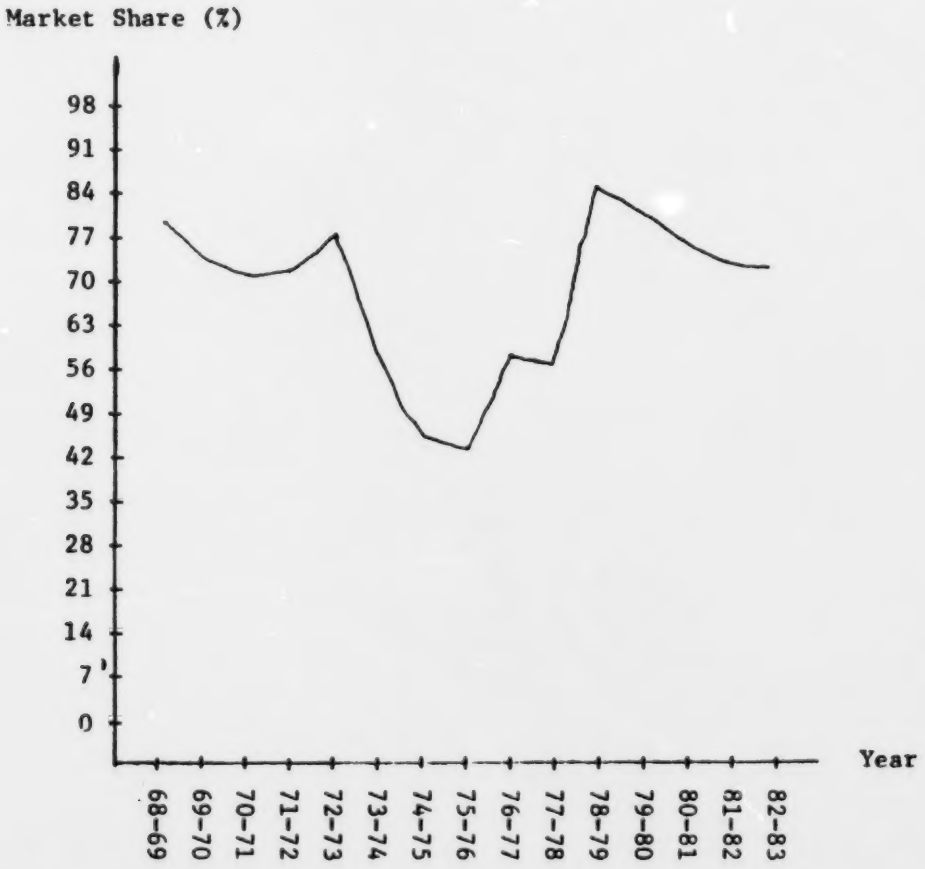
NEW BRUNSWICK SHIPMENTS TO THE
SAINT JOHN TABLE POTATO MARKET



QUEBEC CITY TABLE POTATO MARKET

New Brunswick and Quebec are the primary suppliers of the Quebec City potato market. Over the past 15 years, New Brunswick and Quebec have accounted for an average of 44.28% and 38.79% respectively of the total market. During this period, New Brunswick has been steadily losing their market share which has dropped from a high of 63.84% in 1972-73 to their current market share in 1982-83 of 26.89%. Quebec has been steadily increasing their market share during the same period from a low of 25.19% in 1972-73 to a high of 58.45% in 1982-83. Prince Edward Island and the United States, while only secondary suppliers to this market, have increased their market share during this period. Prince Edward Island's market share has remained stable during the past 5 years holding an average of 10-12% of the total market and the United States, though more unstable, has held an average of 6-8% of the total market.

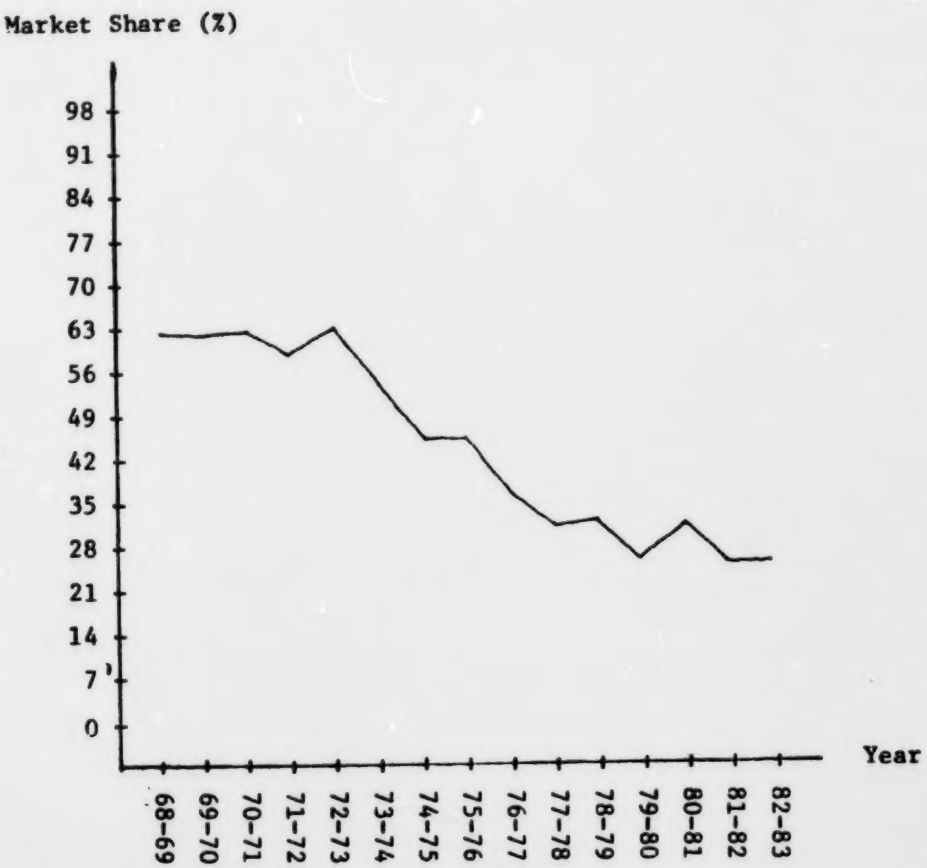
NEW BRUNSWICK SHIPMENTS TO THE
QUEBEC CITY TABLE POTATO MARKET



MONTREAL TABLE POTATO MARKET

The Montreal potato market is supplied mainly from Prince Edward Island, Quebec, New Brunswick and the United States. New Brunswick has been steadily losing their share of this market over the last 15 years from a high of 45.40% in 1970-71 to a low in 1982-83 of 10.23%. Prince Edward Island has increased their market share approximately 10% during the same period and over the last 5 years, has remained stable with close to 30% of the total market. Quebec has been the largest supplier over the 15 year period with an average of 32.46% of the total market. Although Quebec in 1982-83 held 51.32% of the market, their market share has been fluctuating from year to year with no set pattern developing. The United States has remained slightly more consistent with 10-11% of the total market over the past 5 years.

MONTREAL TABLE POTATO MARKET

OTTAWA TABLE POTATO MARKET

Over the past 15 years, the Ottawa potato market's largest supplier has been Prince Edward Island. The Island has steadily increased their market share and in 1982-83, held 55.36% of the total market. New Brunswick, which held a large share of the market at the beginning of this period, has drastically dropped their share of the market which Prince Edward Island has taken and in 1982-83 held only 8.42%, which is a drop in market share over the 15 year period of approximately 32%. Quebec and Ontario have remained fairly stable over the period with an average of 11.54% and 18.42% respectively. The United States over the past 5 years, has steadily lost their market share and currently hold 7.03% of the total market.

NEW BRUNSWICK SHIPMENTS TO THE
OTTAWA TABLE POTATO MARKET

TORONTO TABLE POTATO MARKET

The Toronto potato market is supplied mainly by Prince Edward Island, Ontario and the United States. The average market share over the last 15 years for each of these areas is an accurate indicator of how the market has been currently divided over the last 5 years. Prince Edward Island has approximately 55% of the market with Ontario and the United States holding roughly 24% and 15% respectively. New Brunswick's market share has dropped considerably since 1971-72 when it had 11% of the market. Over the last 7 years, New Brunswick has held an average of less than one-half of 1% of the Toronto market.
